

COMMERCIAL SUNROOM PRODUCTS

A Division Of Patio Enclosures, Inc.

NIKE IHM INC.
ST. LOUIS, MO

Copyright 2004 Patio Enclosures, Inc.

The existing cafeteria was overcrowded, providing the facility engineers a challenge of adding additional space for employees. **Nike** sought expertise from The Commercial Division of Patio Enclosures, Inc. to creatively solve their space demand cost effectively.

Utilizing our solarium curtain wall system, C.S.P. enclosed an existing patio area with high performing, Low E insulated glazing, with the addition of a smoking enclosure to separate the main seating area and provide for a common location for smokers.

The white aluminum frame blends harmoniously with the existing structure and along with blue-green glazing, renders a bright, inviting place for employees to relax and unwind.

The flexibility of C.S.P.'s design and engineering, combined with precision manufacturing and installation by company employees, makes C.S.P. the only choice for your next project.

C.S.P., the recognized leader in glazed structures.

The building features are:

- 1" high performance, Low E Azuria glass
- Duracron/Polycron white finish
- Commercial doors with panic hardware
- 6" Superfoam Roof System
- Single source, turnkey responsibility

The Commercial Division of Patio Enclosures, Inc. will solve your space needs. Contact us for more information or to obtain our CD-Rom.
